The funds benefit from a highly experienced fund management team, supported by Rathbones' investment process and research capability across both traditional and sustainable investment markets. Our LED (Liquidity, Equity-type risk, Diversifiers) framework provides a distinctive approach to asset allocation, focusing on the relationship between assets.

¹ Each strategy has a target return in excess of inflation (as measured by the UK Consumer Price Index) or cash (as measured by the Bank of England Base Rate).

² Each strategy has a maximum volatility target measured against the volatility of equity markets, as represented by the FTSE Developed World Index.
